

Some of the world's largest
software implementations use
STT Trainer.

Here's Why:

- **Application-independent**
STT Trainer creates training for any software application
- **A Smart and Effective Way to Learn**
Training is interactive, stimulating, and easy to access
- **Centralized Structure**
The power of STT Trainer is in the server – with centralized storage of single source files, multi-modal publishing, and global settings that allow you to standardize and streamline development and deployment
- **A Company that Cares**
Kaplan has over 60 years dedicated to education and training. We are committed to your success. Talk with us and find out how much we care

What is STT Trainer?

Uniquely powerful, STT Trainer provides a wide variety of instructional design and software elements to enable the creation of rich, engaging and highly effective software simulations for employee training.

Training Developers benefit from robust features in our Recorder and Editor that have been consistently added to our product over the last 12+ years. No other tool can be used for as many different applications, or offer as much flexibility and as many efficiencies during training creation and publication.

Training Managers can manage the entire training development project within STT Trainer gaining accurate insights into project status and management. The STT authoring environment provides a myriad of project management capabilities making it easy to access, administer and deploy training courses.

Learners benefit from a wide range of training outputs, including preview, simulations, documentation, and in-application (EPSS) support improved learner retention with our unique instructional design methodology. An immersed learning experience leads to longer retention.

About STT Trainer's effective software simulation training solution for adult learners

STT Trainer's robust set of software components has been optimized to enable our clients to create the richest and most flexible software simulations for employee training. The value of STT Trainer is especially apparent when it is necessary for multiple authors to work together, or when there is a need for training content to be updated in the future. Unmatched in speed, ease of creating content, and effectiveness of output, from development to deployment and beyond.

FEATURE COMPARISONS	STT Trainer	Others	Yours
Server-based collaborative authoring	✓	?	<input type="checkbox"/>
No Learner licensing	✓	?	<input type="checkbox"/>
Publish to your own SCORM-Conformant LMS	✓	?	<input type="checkbox"/>
Integrated project management for quality assurance and a smooth workflow	✓	?	<input type="checkbox"/>
Creates bandwidth-friendly courses automatically	✓	?	<input type="checkbox"/>
Allows the creation of 50 courses in less than 1 day	✓	?	<input type="checkbox"/>
Based on the latest generation of enabling technologies from Microsoft (.NET framework and web services)	✓	?	<input type="checkbox"/>
Removes the need to email work in progress between authors	✓	?	<input type="checkbox"/>
Global replacement of application-specific objects	✓	?	<input type="checkbox"/>
Author groups and course locking for large development teams	✓	?	<input type="checkbox"/>
Application independence: capture any web, Microsoft or java based software application	✓	?	<input type="checkbox"/>
Standard output into multiple modes: preview, interactive training, accurate assessments, training documentation, EPSS	✓	?	<input type="checkbox"/>
Grouping of tasks to aid retention and leave application interface visually unchanged	✓	?	<input type="checkbox"/>
Single Source File: record application screens once, edit all modes together or individually	✓	?	<input type="checkbox"/>
Laser beam for learner expediency	✓	?	<input type="checkbox"/>
Zero footprint on your learners' computers – no need for special plugins to run content	✓	?	<input type="checkbox"/>
Update small pieces and republish content at any time without having to recapture	✓	?	<input type="checkbox"/>
Enrich your training with web content, multimedia, sound clips, PowerPoint and Flash files	✓	?	<input type="checkbox"/>
Use global settings for your own branding and color schemes	✓	?	<input type="checkbox"/>
Set up multiple training repositories for different training projects in your organization	✓	?	<input type="checkbox"/>
Include soft skills training and multiple choice quizzes seamlessly in your software simulation courses	✓	?	<input type="checkbox"/>
Use STT Trainer learning portal, STT InfoShare or your own LMS to deliver your training	✓	?	<input type="checkbox"/>
Provide EPSS along with scheduled courses and printable training documentation – all in one step	✓	?	<input type="checkbox"/>
Get a faster and longer lasting return on your investment than with any other authoring tool	✓	?	<input type="checkbox"/>
